NEOTECTONICS OF POLAND: RECENT ADVANCES

Edited by

Witold ZUCHIEWICZ

Neotectonics, morphotectonics, seismotectonics – state of research and perspectives for the future: Introduction (Witold ZUCHIEWICZ)	5
Symptoms of Quaternary tectonic vertical movements in NW Poland (Marcin KURZAWA)	13
Recent crustal movements in Late Tertiary tectonic zones of the Sudetes and Northern Sudetic Foreland, SW Poland (Stefan CACOŃ and Stanisław DYJOR)	31
Determination of geological conditions of shaft deformations in the Wieliczka salt mine, South Poland (Zbigniew SZCZERBOWSKI and Mieczysław JÓŻWIK)	47
Geological control on the rocky landslides in the Polish Flysch Carpathians (Włodzimierz MARGIELEWSKI)	53
Morphotectonics of the Gorce Mountains, Western Outer Carpathians (Andrzej FORMA and Witold ZUCHIEWICZ)	69
Seismicity of Poland (Zofia Maria MORTIMER)	79
Seismicity and seismic hazard in Poland (Barbara GUTERCH and Hanna LEWANDOWSKA-MARCINIAK)	85

SUBFOSSIL POPULATIONS OF SNAILS FROM VISTULIAN LOESSES

Differentiation of subfossil populations of snails from Vistulian loesses of Southern Poland (Małgorzata ŁOPUSZYŃSKA)	101
