

CONTENTS

INTRODUCTION	6
GEOLOGICAL SETTING OF THE STUDY AREA	7
MATERIAL AND METHODS... ..	8
1. Drilling and sampling... ..	8
2. Sediment analyses	8
3. Datings	10
4. Pollen analyses	11
TYPES OF LANDSLIDES AND THEIR SEDIMENTARY BASINS	11
1. Landslide types	11
2. Types of depressions	12
CASE STUDIES	13
1. Żurawnica	13
2. Osieczkowa	19
3. Bogdanówka-Belo	23
4. Zięby	29
5. Pękałówka	33
6. Siódkowo	37
7. Mirkowo	43
8. Pcim Krzywica	48
9. Kamiennik	50
10. Pcim Sucha 1 and Pcim Sucha 2	54
11. Lubogoszcz	58
12. Mogielica 1	61
13. Mogielica 2	65
14. Mogielica 3	68
15. Łopień	70
16. Podłopień	73
17. Kamionna	74
PALAEOGEOGRAPHICAL RECORD AS A RESULT OF INTERFERENCE OF VARIOUS FACTORS – SPECIFICITY OF SLOPE FACIES	77
1. Specificity of the depositional environment	79
1.1. Landslide peat bogs	79
1.2. The character of the delivery of mineral material to landslide peat bogs and types of sediments	82
2. Record of lithological signals	85
2.1. Range of the record of a single event	86
2.2. Record of humid climatic phase (period of humidity growth)	87
2.2.1. Laminated sediments	87
2.2.2. Thick mineral or illuvial unit	87
2.2.3. Trends observed on loss on ignition curves	87
2.3. Mineral covers upon peat	88
2.4. Depositional gaps (hiatuses)	88
3. Record of human activity in sediments	89

RECORD OF CLIMATIC CHANGES IN LANDSLIDE PEAT BOGS IN RELATION TO PALAEOENVIRONMENTAL CONDITIONS	97
1. Oldest Dryas Stadial	97
2. Bølling Interstadial	98
3. Older Dryas Stadial	99
4. Allerød Interstadial	100
5. Younger Dryas Stadial	101
6. Preboreal Phase	103
7. Boreal Phase	105
8. Atlantic Phase	106
9. Subboreal Phase	110
10. Subatlantic Phase	116
PHASES OF MASS MOVEMENT ACTIVITY IN THE POLISH CARPATHIANS RELATED TO OTHER EUROPEAN MOUNTAINS	126
1. Methodological remarks	127
2. Phases of mass movement activity in conventional (BP) time scale	129
3. Phases of mass movement activity in calendar age	133
CONCLUSIONS	134
